

Environmental Policy

Hirsala Golf's main goal is to strive for a sustainable future within golf. We are strongly devoted to make improvements from all environmental aspects to ensure a diverse surrounding to play golf in. We are committed to practicing sustainable environmental, resource and water management, efficient waste management and good risk and health management.

To accomplish our following goals the employees of Hirsala Golf will:

- Comply with all current laws and regulations concerning the environment, resource use, water use and waste handling.
- Reduce material and energy consumption by increasing energy efficiency and relative dematerialization, in other words: doing more with less
- Reduce water consumption and water pollution using efficient irrigation, bio-fertilizers and annual auditing
- Minimize waste production and perform efficient sorting, recycling and reuse
- Preserve biodiversity by protection and enhancement of natural habitats and plants
- Prevent disruption of the ecosystem by reducing fertilizers and pesticides and using eco-friendly substitutes
- Take part of training programs to confine in environmental responsibility and risk management

Everyone at Hirsala Golf is committed to act in accordance with this policy and to embrace ecological responsibility. We all agree to work for a sustainable future and to honor the nature and the living ecosystem that surround us.

Jukka Silventoinen, Head Greenkeeper

Astrid Venäläinen, Managing Director
